“Excellent quality, lighting up the future – P8led module from TSLED factory”

In the dazzling sky of display technology, TSLED factory's P8led module is like a dazzling star, bringing you a shocking visual experience with its ultra-low price, excellent performance and unparalleled quality.

TSLED factory, as the leader in the industry, has been committed to developing and producing the highest quality P8led modules. We have advanced production equipment and exquisite craftsmanship, and strictly control every link to ensure that every module meets the highest standards.

TSLED P8led modules have the following impressive features:

Ultra-high definition: The pixel pitch is only 8 mm, and the delicate and lifelike picture, whether it is text, image or video, can be clearly presented without missing any detail.

Excellent color performance: With a wide color gamut, it can accurately restore the rich colors of the real world, bringing your visual enjoyment to new heights.

Pay equal attention to high brightness and energy saving: while providing bright and clear pictures, it effectively reduces energy consumption, saves you costs, and also contributes to environmental protection.

Stability and durability: After strict quality inspection and long-term reliability testing, it can operate stably in various complex environments and is durable.

Wide range of application scenarios: Whether it is commercial advertising, stage performances, sports events or monitoring and command centers, P8led modules are perfectly capable and meet your diverse needs.

Choosing P8led modules from TSLED factory means choosing quality, choosing innovation, and choosing the future. We will provide you with all-round support with our professional team and considerate services, so that your display projects can shine with the most brilliant brilliance.

Join hands with TSLED factory to light up the wonderful world!

High-Performance Outdoor P8 LED Module

DESCRIPTIONPARAMETERSTECHNOLOGY CENTER

P8 Outdoor LED module
Pixel specification: 1R1G1B
LED specification: SMD3535
Pixel pitch: 8 mm
Resolution:15625dots / m²
Module size:320 * 160mm 256*128mm
scan:1/5 1/4
Brightness: >5500-6000 CD / m²
Module port: HUB75
Viewing angle: Deg. 170
Frame Frequency HZ/S : ≥170
Frame Frequency HZ/S: ≥3840
Maximum power consumption:800 w / m²
Waterproof level: IP65
Use life: 100000 hours or more
Gray level: 8 bit – 16 bit adjustable, the factory standard 14 bit/recommend 65536 level
Control mode: computer synchronous control or Wi-Fi APP Asynchronous Control
The environment temperature: storage: – 40 °C to + 85 °C : operation: – 20 °C – + 80 °C
Environmental humidity: 10% 90%
Pixel is out of control rate: < 0.0001 (LED industry standard: less than three over ten thousand)
Supply mode: AC220V / 50 hz or AC110V / 60 hz
